

**Table S1.** Trajectory of individual dyspnea scores over time

	Resting	Eating	Talking	Dressing	Bathing	Bowel Movement	Stairs	Exercise
Increasing NRS Dyspnea Score Trend, % (n)	53% (17)	53% (18)	50% (16)	59% (19)	74% (23)	56% (18)	61% (14)	45% (10)
Decreasing NRS Dyspnea Score Trend, % (n)	47% (15)	47% (16)	50% (16)	41% (13)	26% (8)	44% (14)	39% (9)	55% (12)

Abbreviations: NRS, numerical rating scale

Only patients with  $\geq 3$  numerical rating scale scores were included in the analysis of trend. Any patient with an increase in NRS  $\geq 1$  were considered to have an increasing trend. Any patient with a decrease in NRS  $\geq 1$  were considered to have a decreasing trend.
