Oh got it. These tables were created by me. There is no need for permission to publish them.

Dr. Schiep,

Actually, if permission is really needed, it has to come from the journals whose references are listed from. What we would like to know is whether your tables' data were taken from tables published in other journals, then you would have to request permission to publish them. Otherwise, permission is not needed.

Let me know if you have any questions,

- Legend of table 1 and table 2 refers to references in the text of the manuscript. Please provide permission to reprint or include a statement that permission is not necessary (and why) by email.
