

Supplementary material

This supplementary material is hosted by Eurosurveillance as supporting information alongside the article “Highly pathogenic avian influenza H5N1 infection in farmed minks, Spain, October 2022” on behalf of the authors who remain responsible for the accuracy and appropriateness of the content. The same standards for ethics, copyright, attributions and permissions as for the article apply. Eurosurveillance is not responsible for the maintenance of any links or email addresses provided therein.

Supplementary Table 1. RT-PCR of the influenza A virus matrix gene results in organs and swabs collected in minks. *Cycle threshold (Ct) value, cut-off value is 35.

Animal number	Sampling date	Ct values*
