# Data Sharing Statement

**Data**
**Data available:** No

**Additional Information**
**Explanation for why data not available:** In keeping with safeguards required by the Health Insurance Portability and Accountability (HIPAA) Privacy and Security Rules we will not make all datasets publicly available due to risk of re-identification and breach of patient confidentiality. Qualitative interview guides are available to interested researchers upon request. The diagnostic codes used to create the analytic dataset used for this analysis are publicly available from the Mental Health Research Network: https://github.com/MHResearchNetwork/Diagnosis-Codes.
