eMethods

Determination of presence or absence of inpatient psychiatric unit

For the eight hospitals that had inconsistent psychiatric unit billing, we reviewed the detailed numbers of psychiatric unit encounters for each month. For two hospitals, psychiatric unit charges were billed each year during the study (though not every month), and we were able to confirm based on review of hospital websites and news reports that psychiatric inpatient units did exist for the duration of the study. These two hospitals were defined as having psychiatric units. For two other hospitals, we determined based on review of the data and external corroboration that they did not have an inpatient psychiatric unit. One of these hospitals only had one psychiatric inpatient unit billing charge during the entire study. The second hospital had psychiatric inpatient unit billing charges during 3 years of the study but we confirmed with clinicians at this hospital that while there is a special unit for patients requiring a medical admission but who had behavioral health comorbidities, which may explain the psychiatric unit charges, no true inpatient psychiatric unit existed.

Three other hospitals had partial years of psychiatric unit billing and we were able to confirm through news reports or press releases that they opened or closed a psychiatric unit during the study. One hospital had partial years of psychiatric unit billing, but we were unable to confirm whether they did or did not have a psychiatric unit. These 4 hospitals that had either confirmed unit opening or closing or for whom we were unable to confirm presence of a psychiatric unit were excluded from the variable definition and thus from the study cohort.
