

Table S4. National estimates of full immunization coverage (FIC), Wagstaff’s index of inequality (W) and Erreygers’ index of inequality (E) among children between 24 and 35 months of age. The lower and upper bounds refer to the 95% confidence intervals of W and E. Countries are ranked from the worst performing (i.e., lowest vaccination rate or highest magnitude of inequality) to the best performing. Sampling weights were applied in all calculations.
