

Supplementary Table S1. Definitions of drugs analyzed

ARB type	ATC code
Candesartan	C09CA06, C09DB07, C09DA06
Fimasartan	C09CA10, C09DA10
Irbesartan	C09CA04, C09DA04
Losartan	C09CA01, C09DA01, C09DB06
Olmesartan	C09CA08, C09DB02, C09DA08, C09DX03, C10BX
Telmisartan	C09CA07, C09DA07, C09DB04
Valsartan	C09CA03, C09DB01, C09DA03, C09DB08, C09DX04

ARB, angiotensin receptor blocker; ATC, anatomical therapeutic chemical.

Supplementary Table S2. Definitions of clinical events

Clinical event	KCD code	Definition
MACE	I21, I22, I60 - I64, I50, I110, I130, I132, O1640, O1641, O1648, O1649, OA641, OA647, OA648, OA649, I46	At least one of these codes.
Cardiac death	I110, I21, I130, I132, I46, I50, I61 – I64	Death record with at least one of these codes.
Non-fatal MI	I21-I22	At least one of these codes.
Stroke	I60-I64	At least one of these codes.
Hospitalization for HF	I110, I130, I132, I50	At least one of these codes and record of admission.
Coronary revascularization	O1640, O1641, O1648, O1649, OA640, OA641, OA647, OA648, OA649	At least one of these codes.

MACE, major adverse cardiovascular event; MI, myocardial infarction; HF, heart failure.

Supplementary Table S3. Results of Cox-regression analyses showing the hazard ratios of each component of MACE according to different ARBs

Cardiac death (Ref.=Losartan)	Crude model				Adjusted model*			
	HR	95% CI		P-value	HR	95% CI		P-value
		Low	High			Low	High	
Candesartan	0.951	0.845	1.071	0.409	1.027	0.912	1.157	0.656

*The following variables were adjusted: age, sex, dyslipidemia, smoking, drinking, exercise, body mass index, systolic blood pressure, albuminuria, glomerular filtration rate, and concomitant medications including calcium antagonists, beta-blockers, angiotensin converting enzyme inhibitor, diuretics, antithrombotic agents, and statins.

CI, confidence interval; HR, hazard ratio.

Supplementary Table S5-1. Risks for all-cause mortality and MACE according to different ARBs compared to those associated with losartan (only ARB)

All-cause mortality (Ref.=Losartan)	Crude model			Adjusted model*			P-value	
	HR	95% CI		P-value	HR	95% CI		
		Low	High			Low	High	
Candesartan	0.778	0.634	0.956	0.717	0.918	0.747	1.128	0.461
