

Fig. S3

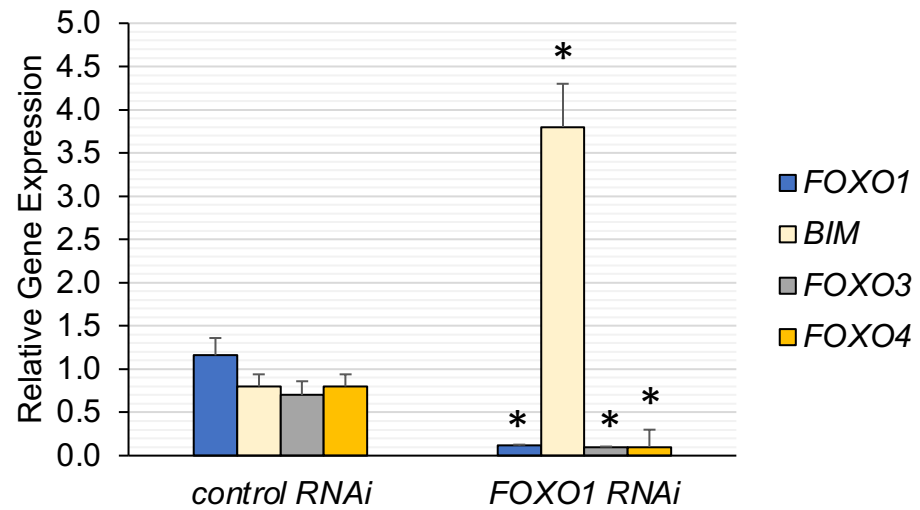

Fig. S3 *FOXO1* RNAi Treatment led to the induction of *BIM*. *FOXO1* RNAi samples had increased *BIM* and decreased *FOXO3* and *FOXO4* in BT549 cells. These samples were treated with *FOXO1* esiRNA and samples collected 18-hours post-transfection. * denotes significantly different by Tukey Test compared to control ($P < 0.05$).
