

## Data Sharing Statement

<b>Article Info</b>	<a href="https://dx.doi.org/10.21037/tlcr-22-314">https://dx.doi.org/10.21037/tlcr-22-314</a>	
<b>Item</b>	<b>Question</b>	<b>Authors' Response (place "-" if not applicable)</b>
1	Would you like to share data collected for your study to others?	Available upon request.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	Deidentified survival data circulating tumor cell counts and gene expression data will be shared upon request.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Deidentified survival data circulating tumor cell counts and gene expression data will be shared upon request.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival data may be updated over time.
7	To whom will you share the data?	Medical oncologists who are interested in studies of circulating tumor cells.
8	For what type of analysis or purpose?	For analysis to evaluate the clinical relevance of CTC in lung cancer patients.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: <a href="mailto:encoehen@mdanderson.org">encoehen@mdanderson.org</a>
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
