Supplementary Data

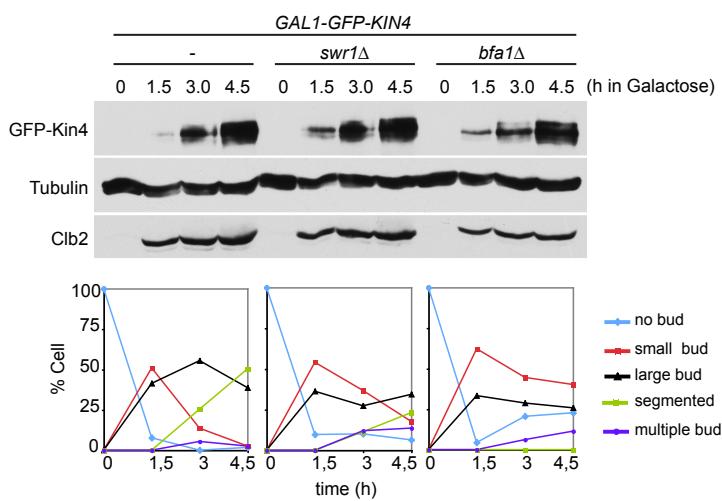

SWR1 Chromatin Remodeling Complex Prevents Mitotic Slippage during Spindle Position Checkpoint Arrest

Ayse Koca Caydasi, Anton Khmelinskii, Zoulfia Darieva, Bahtiyar Kurtulmus, Michael Knop and Gislene Pereira

		number of genes
SGA hits	Total number	100
	GO: mitochondria, ribosome, t-RNA, galactose met.	26
manual test	Could not be deleted in another background	6
	Deleted in another background	68
	Deletion rescues Kin4 overexpression toxicity	52
	Deletion causes reduced Kin4 overexpression	8
	Deletion causes SPOC deficiency	28

Figure S1. Genome-wide genetic screen to identify gene deletions that rescue the lethality of *KIN4* overexpression lethality and its validation. The table summarizes the number of screen hits and validated results.

A

B

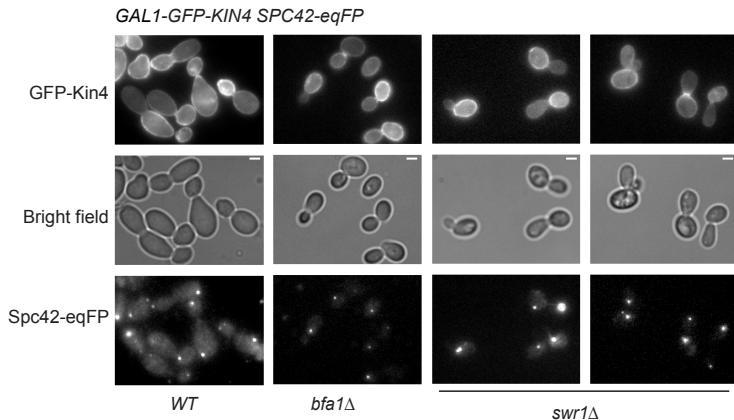

Figure S2. *swr1Δ* rescues *KIN4* overexpression lethality. A-B. Cells synchronized in G1 were released in galactose containing medium ($t=0$) to induce *KIN4* overexpression. Samples were collected as indicated time point for immunoblotting to observe Kin4 and Clb2 levels (A upper panel), for microscopy after DAPI staining to observe budding and chromosome segregation (A lower panel) and for fluorescence microscopy of Kin4-GFP to observe Kin4 localization (B). *GAL1-KIN4* cells arrested as large budded or segmented cells after 4.5 h of *GAL1* induction. Deletion of the target of Kin4 (*bfa1Δ*), abolished this phenotype. After 4.5h of induction *bfa1Δ* cell population was a mixture of non-budded, small budded, large budded and

multi budded cells. Similar to *bfa1Δ*, *swr1Δ* cell population contained non-budded, small budded, large budded and multi budded cells after 4.5h of induction. Differently from *bfa1Δ*, *swr1Δ* population also had a pool of segmented cells, albeit to a lesser extent than *SWR1* cells.

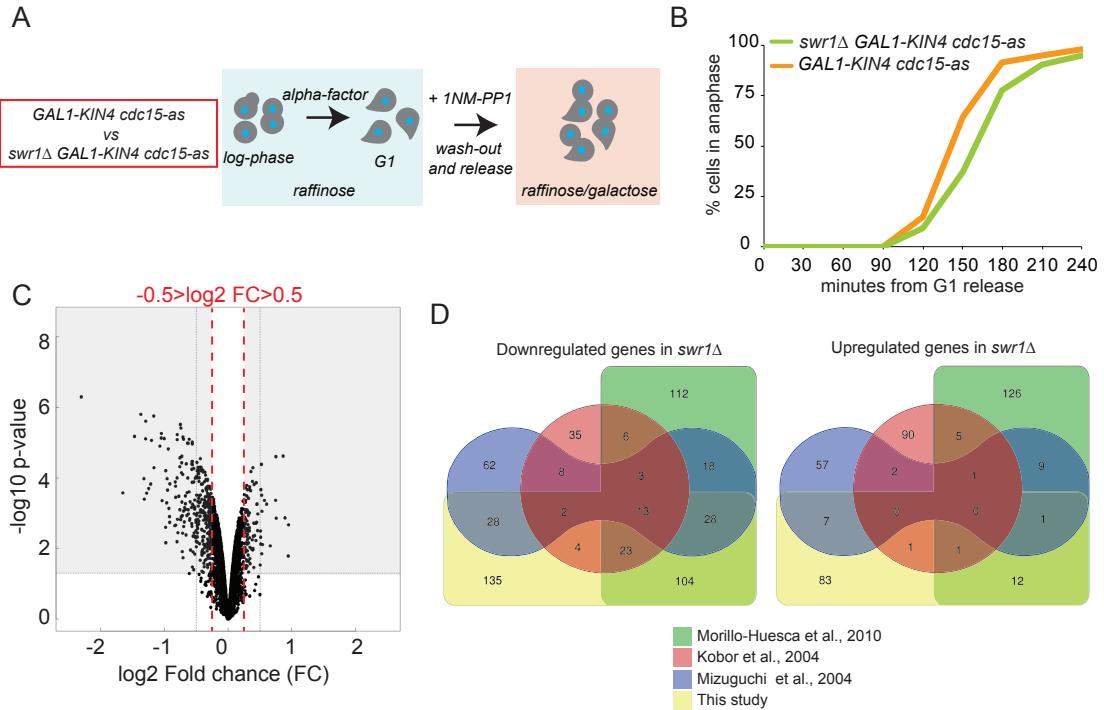

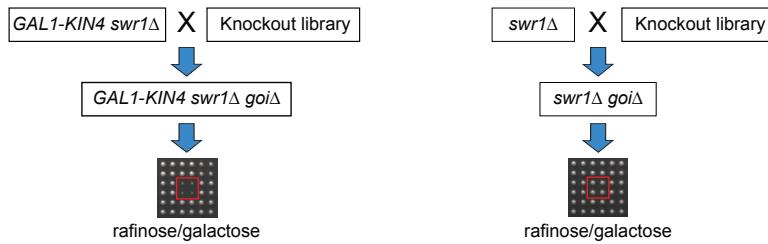

Figure S3. Analysis of *SWR1* dependent gene expression in anaphase arrested cells. A. Schematic diagram of the experimental setup. B. The graph shows the percentage of anaphase cells in the experiment depicted in A. At least 100 cells were counted at each timepoint. Cells in anaphase were scored based on separated nuclei in cells after staining of the cells with DAPI. Cells from the 240 min were collected for microarray analysis. C. Volcano plot shows the log₂ fold change differences in *SWR1* and *swr1Δ* cells. D. Venn diagram comparing the *SWR1* dependent mRNA changes identified in this study and previous studies.

A**B**

		number of genes
SGA	Hits	69
	Enriched in protein-protein associations	45
manual test	Deleted in another background (at least two genes from each protein complex)	32
	Deletion synthetic sick with <i>GAL1-KIN4 swr1Δ</i> on raffinose/galactose	29
	Deletion rescues SPOC deficiency of <i>swr1Δ</i>	4
strong phenotype	2	
	weak phenotype	

Figure S4. SGA screening reveals genes required for mitotic exit in *swr1 Δ GAL1-KIN4* cells. A. Schematic representation of the SGA screen. Briefly, gene deletions (gene of interest, *goi Δ*) that diminish the growth of *GAL1-KIN4 swr1 Δ* but not of *swr1 Δ* on plates containing raffinose/galactose (*GAL1-KIN4* inducing condition) were selected. An example of one gene deletion with the desired phenotype (in quadruplicate) is highlighted in red. B. Summary of number of hits obtained from the SGA screen and validated hits through manual test.

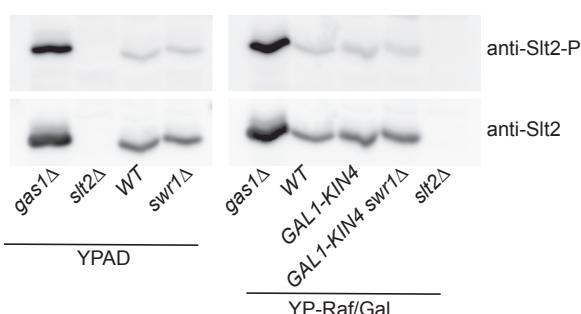

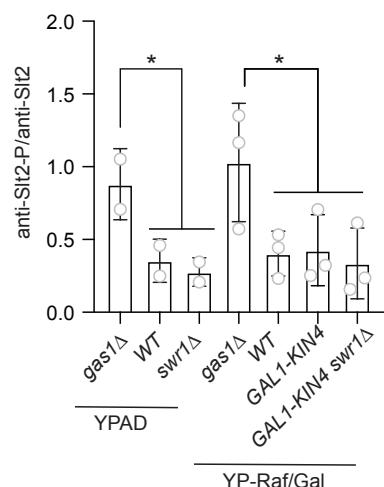

A**B**

Figure S5. Cell wall integrity (CWI) pathway is not activated by Kin4. A. Wild type, *GAL1-KIN4* and *GAL1-KIN4 swr1 Δ* carrying cells were grown in glucose (YPAD) or galactose (YP-Raf/Gal) media to repress or induce Kin4 overproduction, respectively. Active Slt2 (Phosphorylated Slt2, Slt2-P) and Slt2 total protein levels were analyzed by immunoblotting. *gas1 Δ* cells were used as a control for CWI hyperactivation (enhanced Slt2 protein levels and phosphorylation), whereas *slt2 Δ* cells served as a control for antibody specificity. B.

Quantification of A showing the normalized ratio of phospho-Slt2 to total Slt2 from three independent experiments. Error bars are standard deviation. One-way Anova test was performed. *p<0.05.

Supplementary Tables and linked Data Sets:

Supplementary Table 1. Top 100 hits of the SGA screen which identified gene deletions that rescue the lethality of *KIN4* overexpression. (Linked data: **Data Set 1.** Source data for Supplementary Table 1)

Supplementary Table 2. Validation of the hits of the screen results presented in Supplementary Table 1. (Linked data: **Data Set 2.** Source data for Supplementary Table 2.)

Supplementary Table 3. Up and down regulated genes in *GAL1-Kin4 cdc15-as swr1Δ* cells in comparison to *GAL1-Kin4 cdc15-as SWR1* cells. (Linked data: **Data Set 3.** Source data for Supplementary Table 3.)

Supplementary Table 4. Gene ontology analysis of differentially regulated mRNAs by SWR1-C. (Linked data: **Data Set 4.** Source data for Supplementary Table 4.)

Supplementary Table 5. Raw data and hits of the SGA screen which identified gene deletions that cause lethality of *KIN4* overexpression in *swr1Δ* background. (Linked data: **Data Set 5.** Source data for Supplementary Table 5.)

Supplementary Table 6. Validation of the hits of the screen results presented in Supplementary Table 5. (Linked data: **Data Set 6.** Source data for Supplementary Table 6.)

Supplementary Table 7. Table of strains used in the study.

Supplementary Table 1. Top 100 hits of the SGA screen which identified gene deletions that rescue the lethality of KIN4 overexpression.
