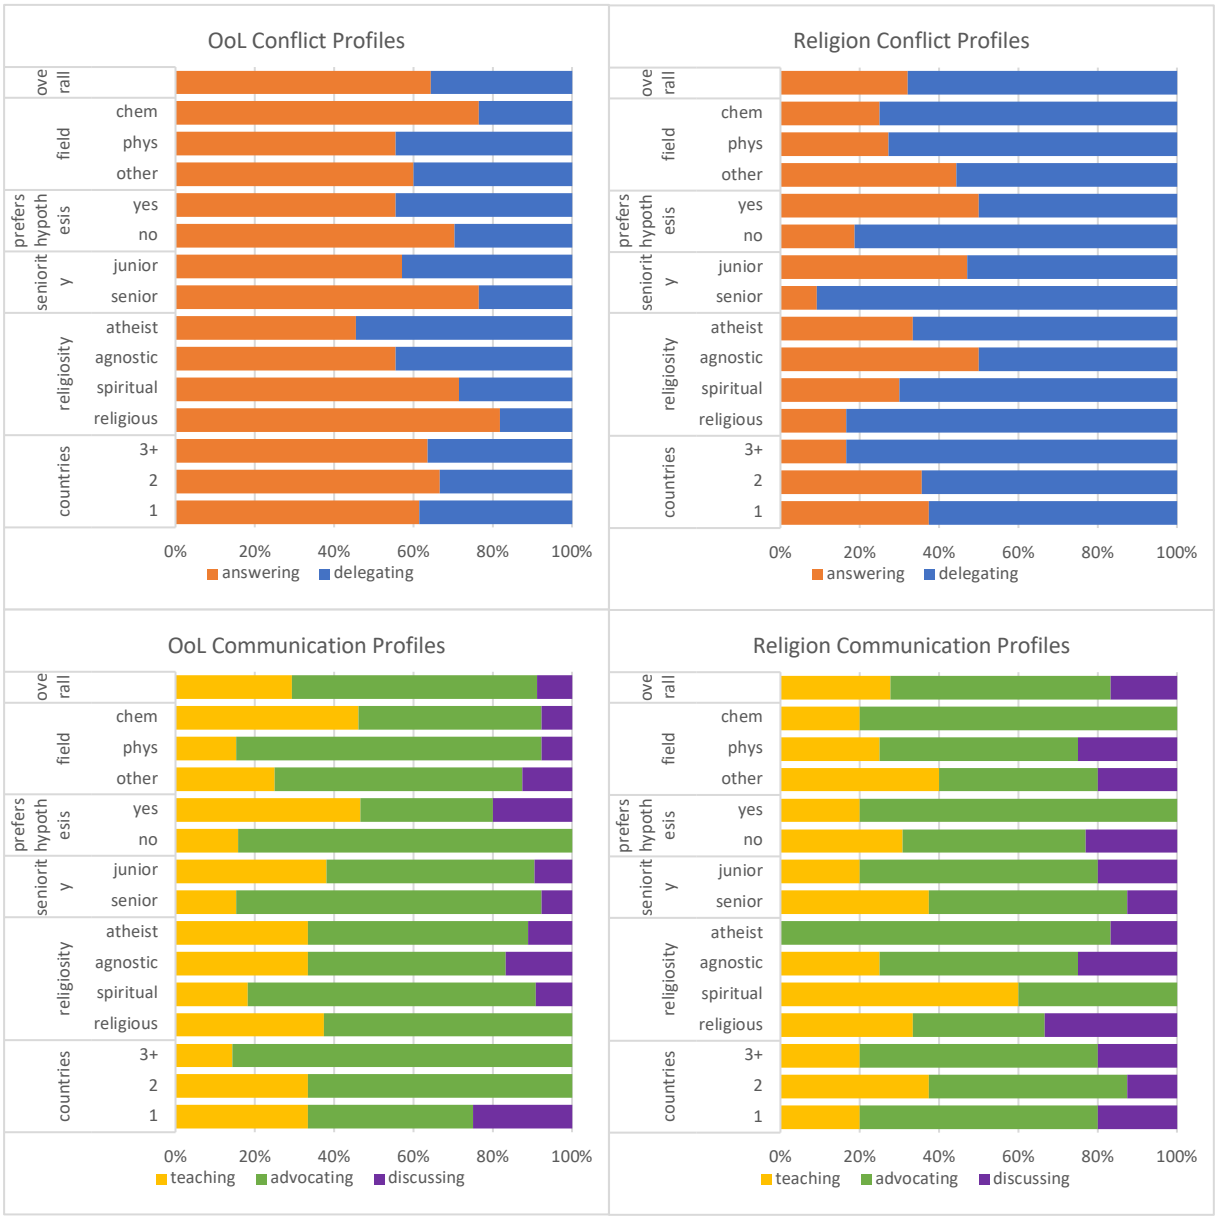
Figure S2: Additional demographics for controversy and communication profiles



The top two panels show the distribution of the controversy profile for the OoL debate (left, n=45) and the for the controversy with religion (right, n=28) according to discipline, to whether the scientists expressed preference for any OoL-hypothesis, their career stage, religiosity and number of countries visited during their career.
The bottom two panels show analogous distribution of the communication profile on the OoL debate (left, n=34) and the debate with religion (right, n=18).
