

Supplementary Figures

Suppl. Fig. S4. Effect of the STRN/STRN3 on SC35M replication in 293T cells. Expression of *STRN/STRN3* was reduced upon knockdown with specific siRNAs. Cells were infected with SC35M virus (MOI = 0.001) and the viral titers were determined at the indicated time points. Bars indicate means \pm s.d. obtained from three independent experiments performed in triplicates, asterisks indicate *P* values (***P* \leq 0.01).
