

Cell Reports Medicine, Volume 4

Supplemental information

**Humoral signatures of MOG-antibody-associated
disease track with age and disease activity**

Marianna Spatola, Omar Chuquisana, Wonyeong Jung, Joseph A. Lopez, Eva-Maria Wendel, Sudarshini Ramanathan, Christian W. Keller, Tim Hahn, Edgar Meinel, Markus Reindl, Russell C. Dale, Heinz Wiendl, Douglas A. Lauffenburger, Kevin Rostásy, Fabienne Brilot, Galit Alter, and Jan D. Lünemann

Figure S1

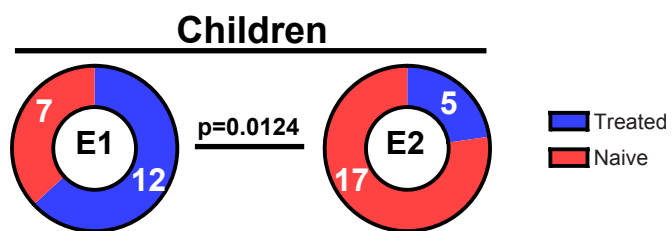

Figure S1. Proportion of treated (blue) vs treatment-naive (red) patients with endophenotype 1 and endophenotype 2. Patients receiving immunotherapy are not enriched in the less proinflammatory endophenotype 2. Statistical comparison: Fisher exact test. Related to Figure 2 and 3
