S4 – Supplemental File. Interactive Data Set Availability

Data have been aggregated into the categories identified in the *Methods* section to protect identities of subjects (e.g., Race/Ethnicity aggregated to Underrepresented). The interactive dataset is available via Tableau, such that readers can isolate the factors of interest and examine effects on career self-efficacy by any combination of factors combined or independently (e.g., Gender, Race/Ethnicity, Career Interest, Seniority). Note that HTML code can be provided to host on PLOS ONE if desired. (Link:
