

Supplemental Table 3. Summary of patiromer dispensing and drug courses in the full study population

	Study Cohort (n= 270)		
	<u>Mean</u>		<u>95% CI</u>
Patiromer dispensing events	2.77		2.55-2.99
Cumulative dosage dispensed (g)	994.65		878.35-1110.96
Day supply per dispensing	38.94		36.33-41.56
	Patiromer treatment courses (c=334)		
	<u>Mean</u>		<u>95% CI</u>
Number of drug courses	1.24		1.18-1.29
	<u>n</u>	<u>%</u>	
Patients with 1 course	209	77.4	
Patients with > 1 course	61	22.6	
	<u>Mean</u>		<u>95% CI</u>
Course duration (days)	75.76		69.47-82.04
Average prescribed daily dose (g)	9.22		8.8-9.64
Average observed daily dose (g)	9.4		8.8-10
Course PDC	0.95		0.94-0.96
	<u>n</u>	<u>%</u>	
Active course at the end of follow up time	83	24.9	
Courses with death date recorded during drug course	6	1.8	
Censored courses at the end of follow up time ^a	89	26.7	
Median course duration (days)	65		60-73
PDC = proportion of days covered			
^a Including active courses and courses with patient death date during drug course.
