

Supplemental Table 5. Summary of patiromer dispensing events and drug courses in patients with baseline serum potassium ≥ 5.5 mEq/L

	Study Cohort (n= 141)	
	<u>Mean</u>	<u>95% CI</u>
Patiromer dispensing events	2.85	2.53-3.17
Cumulative dosage dispensed (g)	1034.27	857.85-1210.7
Day supply per dispensing	36.75	33.13-40.37
	Patiromer treatment courses (c=174)	
	<u>Mean</u>	<u>95% CI</u>
Number of drug courses	1.23	1.16-1.31
	<u>n</u>	<u>%</u>
Patients with 1 course	109	77.3
Patients with > 1 course	32	22.7
	<u>Mean</u>	<u>95% CI</u>
Course duration (days)	73.73	65-82.46
Average prescribed daily dose (g)	9.64	8.99-10.29
Average observed daily dose (g)	9.96	8.97-10.94
Course PDC	0.95	0.94-0.96
	<u>n</u>	<u>%</u>
Censored course at the end of follow up time ^a	46	26.4
Median course duration (days)	62	57-70
PDC = proportion of days covered		
^a Including active courses and courses with patient death date during drug course.
